An Initiative by

Endorsed by

Genomic Research Partner

OVERVIEW

Observed annually on 4th February, World Cancer Day is a global advocacy day aimed at promoting cancer awareness, educating the public about the illness, and encouraging governments and advocacy organisations around the globe to act against it in order to reduce the burden of cancer. Presently, cancer is the second biggest cause of mortality in the world.

As a result of research and innovation in clinical and medical oncology, cancer care and management has advanced from an era of ambiguity to one of accuracy.

The advancement in cancer treatment has extended life expectancy and saved many lives. However, despite, improvements in medical technology and health infrastructure, India's cancer rate is still rising, necessitating a review, and upgrading of current approaches to the disease's prevention and management.

According to the National Cancer Registry Programme's most recent study, India's cancer burden might rise from 1.39 million cases in 2020 to 1.57 million cases in 2025. Factors such as late-stage presentation, limited access to appropriate diagnosis and treatment, and cost all contribute to this trend of an increase in the burden of cancer-related morbidity and death in the nation. Further, even when free cancer screening is offered, high-risk populations continue to have poor acceptance rates. A greater knowledge of patient preferences, early treatment facilitators, societal obstacles, and enablers of cancer care in India is therefore urgently needed in addition to the provision of affordable and accessible health care facilities. Against this backdrop, RAPID Global Cancer Alliance in collaboration with the Integrated Health and Well-being (IHW) Council are coming together for the 5th Edition of the Cancer Summit 2024, to focus on some of the challenges related to India's optimum cancer care and to enhance the present healthcare system.

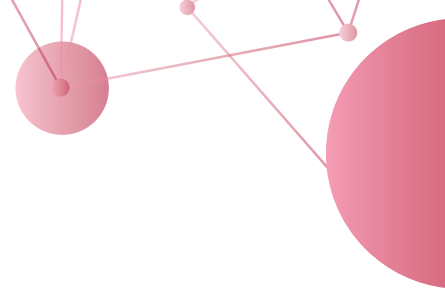

The 5th edition of the Cancer Summit 2024 would bring government representatives, leading medical professionals, lawmakers, social activists, patient advocacy groups, and cancer survivors to provide their perspectives on important topics, innovative solutions, and the various strategies to educate people about cancer and build a favourable environment for cancer control, diagnosis, and management.

RAPID and IHW Council have been relentlessly working as the voice of those affected by cancer, rallying for change, raising awareness, and pushing for policies that improve cancer care, management and advocate for better policy regulations around the same. The Cancer Summit is a step in the direction which pro-actively engages with all stakeholders for multilevel action to tackle the problem of cancer morbidity and mortality.

Tentative Agenda

TIME	SESSION DETAILS
	<p>Session I Prioritizing Accessible and Affordable Cancer Care in National Healthcare Landscape</p> <p>This session will shed light on the urgent challenge of disparities in cancer care, emphasizing the need for comprehensive strategies. With a public policy perspective, the discussion aims to inspire transformative action and foster partnerships that pave the way toward a more inclusive and affordable future in the battle against cancer. By prioritizing accessible healthcare for cancer, irrespective of background or resources, the session advocates for a collective commitment to developing and implementing policies that guarantee the best possible care and support for every individual, contributing to a national policy healthcare landscape where inclusivity is at the forefront of cancer management.</p>
	<p>Session II Empowering Communities: Building Awareness and Enhancing Education for Cancer Management</p> <p>This session aims to drive a comprehensive dialogue on the crucial aspects of creating awareness and providing education in the field of cancer management. Recognizing the profound impact of informed communities on cancer outcomes, the session will explore strategies for raising awareness about early detection, prevention, and the latest advancements in cancer treatment. By fostering an environment of learning and collaboration, this session aims to inspire actionable steps toward building resilient and well-informed communities in the collective fight against cancer.</p>
	<p>Session III Role of Technology in Revolutionizing Cancer Diagnosis</p> <p>This session will explore the transformative impact of cutting-edge technology in the field of oncology, emphasizing how technological advancements are reshaping the landscape of cancer care with a focus on diagnostics. Experts in oncology and technology will discuss recent developments in diagnostic tools, including machine learning algorithms that analyse medical imaging data, genomic information, and clinical records. The session aims to highlight the broader role of technology in cancer diagnostics, with a focus on improving early detection, personalizing treatment plans, and ultimately enhancing patient outcomes.</p>

	<p>Session IV</p> <p>Genomic Medicine and its Role in Cancer Prevention, Early Detection, Precision Intervention and Monitoring</p> <p>The session will delve into gene therapy, which holds promising potential as cancer treatment. The discussion would delve into the latest innovations in genomics for early detection, therapy selection and precision intervention and most importantly pre & post cancer monitoring for better treatment opportunities and their potential applications in cancer. It will also discuss about the promises and challenges of precision medicine like immunotherapy while offering nuanced insights on genomic testing and its future for better cancer treatment and monitoring.</p>
	<p>Session V</p> <p>Rethinking Insurance Models: Tailoring Coverage for Evolving Cancer Therapies</p> <p>The session will delve into the imperative of adjusting existing insurance frameworks to effectively address the distinctive challenges and possibilities arising from the advent of emerging and personalized cancer treatment modalities.</p> <p>As cancer treatment undergoes transformative developments, with the rise of precision medicine, immunotherapy, and other advanced therapies, the conventional one-size-fits-all insurance models may prove inadequate. These novel cancer treatments often come with higher costs, intricate administration, and varying response rates among individuals. The session aims to scrutinize these challenges and explore the opportunities for designing insurance models that can seamlessly adapt to the evolving landscape of cancer care.</p>

RECOGNIZING EXCELLENCE IN CANCER CARE

The Cancer Care Awards stands as a beacon of recognition and celebration, honoring exceptional contributions in the field of cancer care. This prestigious event aims to acknowledge and applaud the tireless efforts of individuals, organizations, and initiatives that have demonstrated outstanding commitment, innovation, and compassion in the realm of cancer care.

The Awards in its second year, provides a platform to shine a spotlight on remarkable achievements, from ground breaking research and innovative treatment modalities to impactful awareness campaigns and patient-centric initiatives.

AWARD CATEGORIES

AWARENESS & EDUCATION

- Most Impactful Cancer Awareness Campaign for Breast Cancer
- Most Impactful Cancer Awareness Campaign for Lung Cancer
- Most Impactful Cancer Awareness Campaign for Prostate Cancer
- Most Impactful Cancer Awareness Campaign for Thyroid Cancer
- Most Impactful Cancer Awareness Campaign for Liver Cancer
- Most Impactful Cancer Awareness Campaign for Gynaecologic Cancer
- Most Impactful Cancer Awareness Campaign for Hematologic Cancer
- Excellence in cancer awareness (Digital Campaign)
- Excellence in cancer prevention and awareness initiative/ programme
- Excellence in cancer prevention and awareness initiative/ programme by an NGP/Foundation/Civil Society
- Best CSR Initiative for Cancer Awareness and Prevention

CARE PROVIDERS

- Excellence in Cancer care (Start-up)
- Excellence in Cancer Care (Hospital) Metro
- Excellence in Cancer Care (Hospital) Non-metro
- Excellence in Cancer Care (Hospital Chain) Non-metro
- Standalone Cancer Hospital & Centre
- Excellence in Cancer Care (Hospital) Regional
- Excellence in Psycho-oncology
- Integrated Cancer Care Centre or Platform
- Excellence in palliative care
- Excellence in promoting patient centric care

AWARD CATEGORIES

DIAGNOSIS & SCREENING

- Excellence in the use of technology/AI for cancer diagnosis
- Innovation in cancer screening technique
- Advancements in Imaging technology for Cancer detection
- Excellence in Genetic testing for Cancer
- Innovation in early detection & prevention strategies
- Excellence in radiation oncology innovations
- Excellence in Clinical Innovation for cancer care
- Breakthrough in Cancer Immunotherapy
- Excellence in promoting integrative health in oncology

About the IHW Council

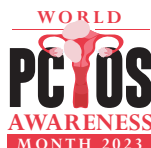

Integrated Health & Wellbeing (IHW) Council is a premier think tank, engaging in everything concerned with health and wellbeing of human enterprise and existence. **'High Five of Health' – Good Air, Good Water, Good Food, Good Lifestyle and Good Healthcare** for all, form the pillars of IHW Council's foundation and it works towards improving access, availability and affordability of all these critical elements of life through another '3A' of awareness, advocacy and action. The Council works to create multiple pathways and multilateral stakeholder engagements to find innovative and effective approaches towards building holistic health eco-system in India.

Over the last decade the IHW Council has successfully brought all relevant contributors in the healthcare ecosystem, from healthcare providers to government representatives and policy makers on a single platform to identify and address the issues in accessible and inclusive healthcare ecosystem for all. Since its inception in 2014, the IHW Council has worked on tackling the various aspects of health advocacy and health awareness through round tables discussions, spotlight sessions, summits and other events including medical camps and awareness rallies, to initiate discussions around holistic health and all other pre-requisites for a healthier and happier nation.

Integrated Health and Wellbeing Council is proud to be actively driving 9 out of the 17 Sustainable Development Goals for the fulfillment the promise of equitable healthcare, while leaving no one behind. It is our firm believe that it is through sharing of best practices amongst health experts, awareness creation at all levels that we can bust myths related to health and healthcare and also advocate for policy regulations on critical aspects of health and environment. Through a gamut of events and activities our endeavors work proactively to empower and engage communities, to achieve a better world for all.

IHW INITIATIVES

Past IHW Council Speakers

Nitin Gadkari
