

## UICC Fellowship Testimonials

UICC would be delighted to feature your profile and story on our website (<http://www.uicc.org/capacity-building/grants/alumni/testimonials>) and other publications to encourage others to follow your example and inspire future grant applicants. We wish to showcase a series of inspirational casestudies which highlight the role played by UICC Fellowships. With that in mind, we would like to feature a testimonial of your experience, your career progression, the collaborative networks that have emerged from this exchange, and the long-term impacts on your area of work.

By showcasing what you achieved you will be offering a great and compelling personal story that inspires, educates and enlightens, as well as providing information to a large and diverse audience. We request that you write a testimonial accessible also to a non-scientific audience outlining/addressing the few questions below.

Please also send us a **photo** of yourself or of you with your host supervisor, or of your activity/project. We advise you to write up to 350 words and please send your testimonials to [fellows@uicc.org](mailto:fellows@uicc.org)

### To guide your story:

- Where are you from and where did you pursue your project? Please provide a brief background regarding the work you did and what you learned on your fellowship.
- Please comment on the importance of this training opportunity and the specific benefits for your country/region.
- What long-term impacts and achievements can you link with your UICC fellowship? (e.g. impact on your own career development, on capacity-building at your home institution, capacity to fundraise, leadership skills, etc.)
- What results came from this activity and how did it lead to a collaborative effort? How will you pursue this collaboration in the future?
