Welcome to the UICC Annual Activity Report. It is my great honour to report to you some of the projects and achievements of UICC, its members, and partners in 2014. It has been a splendid year which concluded with an excellent week in Melbourne, Australia in December. I believe that the 2014 World Cancer Congress was an exceptional event and I was delighted to meet so many UICC members and partners personally during our stay in such a wonderful city.

The year started well with a high profile World Cancer Day campaign themed ‘Debunk the Myths’ which brought together the global cancer community on February 4th, engaging the media and helping society understand that there are many myths and misconceptions which inhibit our ability to address cancer as well as we could.

I was delighted to see individuals and organisations not associated with UICC use the Day effectively by initiating fundraising campaigns or simply by thinking of someone special affected by cancer.

World Cancer Day has dramatically grown in profile and influence over the last few years and is now firmly established in the diaries of all UICC members and partners who use it to raise awareness of cancer across the world.

Following many years of campaigning at the highest level, cancer and other non-communicable diseases (NCDs) continued to be addressed by the United Nations, particularly during the week of the World Health Assembly.
Throughout 2014, UICC played a leading role in the NCD Alliance which now comprises seven organisations, having welcomed Alzheimer’s Disease International (ADI), the Framework Convention Alliance (FCA), and Management Sciences for Health (MSH) to the Steering Group during the year.

Together, we campaigned actively to ensure that the commitments countries have made to address NCDs are followed through with action, and we were thrilled to see NCDs increase their presence on the agenda of the United Nations, particularly during the week of the World Health Assembly and the UN Review on NCDs.

A personal highlight for me was to represent civil society at the UN Review on NCDs in July in New York, in which I delivered a speech stressing the importance of taking action at country level now that we have a shared global commitment.

I am particularly pleased to let you know that UICC has since been asked to be part of the NCD Global Coordination Mechanism which has been established by the World Health Organization.

In 2014, UICC’s Board of Directors set about defining its strategic ambitions for the organisation, with a timeline extending through to 2030. I must thank my predecessor, Mary Gospodarowicz, who managed this process very professionally, involving the Board, external experts and the team in Geneva. The long-term thoughts of the Board are now being translated into a new Business Plan for UICC covering the period 2016-2018, which will be concluded in mid-2015.

We also took time as a Board to reflect on the governance of our organisation. This piece of work, which culminated in the creation of an exceptionally good Governance Framework, involved all Board members and the UICC team in Geneva. It sets out how the President, Board, CEO, and staff work together to ensure that the organisation is run smoothly and effectively. A new Governance Committee was created to oversee this work and remain in place, as we found it to be most effective and a positive contribution to the on-going management of the organisation.

In Melbourne, in addition to running an impressive World Cancer Congress and World Cancer Leaders’ Summit, we also held the UICC General Assembly. The meeting was very well attended with over 200 UICC member organisations represented from more than 100 countries.

I was very proud to start my term as President of UICC during this meeting and to welcome my new Board of Directors - elected by UICC’s full members. It was also a time to say thank you to those individuals who will no longer be on the Board.

In particular, I would like to recognise Eduardo Cazap, Past-President of UICC, who served on the Board for over ten years.

My sincere thanks also goes to Mary Gospodarowicz for her tremendous leadership of the Board during her two years as President and to Cary Adams, our CEO, and his team of incredibly professional and committed individuals who deliver excellence in everything they do.

Thank you.
What an exciting year we had. In continuing to welcome more cancer organisations into the UICC family, we now have over 830 members from 150 countries. It is so pleasing to see that we are more engaged as a community which was evident to me seeing so many UICC members attend and interact so actively during the three days of the World Cancer Congress in Melbourne.

2014 was what we call at UICC a “Congress year”. A year in which we focus our attention on ensuring that the General Assembly, World Cancer Leaders’ Summit, and World Cancer Congress are delivered with excellence.

Of course, there is much else which takes place throughout the year: we are active in advocacy and we run projects addressing specific cancer issues in which UICC can make a significant and unique contribution. For example, the adoption of the palliative care resolution at the World Health Assembly in May was a highlight for many of us.

But it’s true that the year reached a crescendo during the week of the Congress, Summit and Assembly. And we are thrilled to have received such positive feedback from those who joined us in Melbourne.
We were delighted to have 2,700 delegates attend the Congress, 250 attend the Summit and a record number of attendees at the General Assembly.

It also looks as if the new features of the Congress have been very well received and we now have a clear idea of how the Congress in Paris, France in November 2016 will look.

My thanks to all our partners and sponsors who contributed so magnificently to the delivery of all the events in Melbourne.

Financially, in 2014 UICC continued to operate in a sound fashion and delivered another year of growth. We successfully moved to the new Swiss GAAP FER 21, received a clean audit from our auditors PwC as well as operating as the fiscal agent for the NCD Alliance. Our own risk review did not identify any major issues and this was confirmed by the UICC Board of Directors in September 2014.

The full 2014 results will be added to this report after our scheduled audit in May 2015.

Importantly, UICC continued to engage organisations from all sectors in helping to deliver its purpose statement to “unite the cancer community to reduce the global cancer burden, to promote greater equity, and to integrate cancer control into the world health and development agenda.”

Our partner base has increased to 52 organisations, reflecting our desire and ability to work with other cancer and health organisations, leading companies in the private sector, and UN agencies.

This ability to work effectively across many groups, managing any conflicts of interest which may exist or emerge, marks UICC as a forward-thinking and enterprising non-governmental organisation. We fundamentally believe that cancer can only be addressed by working collaboratively as a community.

So as you read this report, please note how much of our work is undertaken with outstanding partner organisations.

It has been a pleasure to chair the NCD Alliance during another year of accomplishments. In addition to the Steering Group expanding to seven organisations, we have witnessed a tremendous growth of in-country NCD alliances. There are now 32 national and regional alliances which have formed and work on the common ground areas which affect all NCDs. I do not think we imagined this happening five years ago and it further supports the UICC view that more can be achieved in partnership than by operating alone.

I would like to thank Mary Gospodarowicz, Tezer Kutluk, and Eduardo Cazap for their on-going support, encouragement and energetic contribution to everything UICC does on behalf of its members. The Board has worked diligently on our strategy and governance and of course, the team in Geneva has responded with great enthusiasm to the challenges we have laid down for them. It has been a truly enjoyable and rewarding year.

Finally, I would like to recognise Juerg Boiller, who left UICC in December, for his service over the last nine years. He leaves with much to be proud of and I am sure he will remain a great friend of the organisation.

Cary Adams
Chief Executive Officer
Following the 2013 Membership Survey, which garnered valuable insights into member expectations, UICC worked diligently throughout 2014 on member engagement and recruitment, continuing to witness steady growth in both areas.

We developed targeted promotional materials to more efficiently attract new segments of membership, and led an intensive outreach campaign that focused on linking UICC members to core activities, for instance the World Cancer Congress and World Cancer Day, stimulating new collaborations in these areas.

2014 was marked by two key events for members: the General Assembly and the World Cancer Congress.

MEMBERSHIP

UICC’s growing membership of over 830 organisations across 150 countries features the world’s major cancer societies, ministries of health, research institutes, and patient groups.
The General Assembly had an unprecedented attendance of more than 200 delegates, with 98 voting members represented. During the General Assembly, members received key updates on UICC’s work and had the challenging task to elect the new Board of Directors from 22 exceptional candidates. The work of the Board of Directors over the next two years will be guided by a framework of collaboration where members’ interests will be strongly represented and taken into consideration.

The World Cancer Congress was also an opportunity to provide an exclusive platform for members through tailored regional meetings. These sessions and their topics of focus were successfully developed in collaboration with the members themselves, with a vision of facilitating the strengthening of ties between organisations at a local, national, and regional level, and addressing issues of common concern.

Participants from the seven regional meetings – Africa, Americas, Europe, Eastern Mediterranean, South-East Asia and Western Pacific – agree with the value that these forums bring, while facilitating face-to-face encounters among cancer organisations and engagement in the work that is being undertaken in their regions. The great demand for this platform guarantees its further development and implementation to be integrated into the programme of future World Cancer Congresses. Members are encouraged to take advantage of these opportunities in their planning and implementation for the next event.

“Being a UICC member has provided me with invaluable opportunities, such as attending the 2014 World Cancer Congress, where I was inspired to develop an online platform for my organisation to empower and network cancer societies in Vietnam for improved cancer control in the country.”

Thung Sobey, Founder and CEO, Breast Cancer Network Vietnam

“UICC recognises the work of our organisation which is dedicated to a future without cancer and improving the lives of those already living with the disease in Ireland. Being part of the UICC community provides us with the opportunity to work hand in hand with key decision-makers from around the world to address emerging issues at an international level.”

John McCormack, Chief Executive Officer, Irish Cancer Society

“When we heard about UICC in 2013, we learned it was very resourceful and trustworthy, inspiring to our organisation’s volunteers and board members, so we decided to become an Associate Member in 2014. Everything UICC has done since has been far beyond our expectations! My personal feeling towards Full Membership is that our organisation is becoming part of the strongest army which combats cancer globally.”

Jula Connatser, President, American Association for Cancer Support, Inc., United States
UNITING THE CANCER COMMUNITY

PARTNERSHIPS
HAND IN HAND TO DRIVE CHANGE ON A GLOBAL SCALE

In the last five years, UICC has developed an increasing number of outstanding partnerships with organisations committed to address cancer globally. Our portfolio of partnerships includes UN agencies, the NCD Alliance, cancer organisations, foundations, and companies in the private sector. Gradually, we have developed long-term commitments based on shared objectives, each supporting the implementation of the UICC business plan. Our campaigns have generated significant financial commitments to our core programmes, our advocacy activities, and our signature events – World Cancer Day, the World Cancer Congress and the World Cancer Leaders’ Summit.

Our current fundraising campaign ‘Together for Action’ has successfully engaged new partners from across our membership and the private sector. Each of our partners contributes to our work in different ways and we are particularly proud to see them engaging with UICC members on World Cancer Day and at the World Cancer Congress.

We anticipate that our partner base will continue to grow in the coming years. Our agenda demands the help and support from others to be delivered successfully. We thank all our partners for their commitment, energy, and support, and within this report we take the opportunity to feature some of them and the work they undertake globally.

The American Cancer Society (ACS) has a long track record of working in partnership with UICC on a range of global initiatives. In addition to advocating for NCDs in the global health agenda with us, we share a commitment to address pain relief around the world. ACS is a valued sponsor of the World Cancer Congress and an active participant on World Cancer Day across the United States.

UICC has worked with Bupa since 2012. Bupa’s purpose is to help people lead “longer, healthier, happier lives”. This context has enabled us to establish a shared ambition to improve the wellness of employees in their workplaces. In 2014, we jointly produced three reports - ‘Cancer – it’s everyone’s business’, ‘Less smoking, better business’ and ‘Tackling breast cancer in the workplace’ - to raise awareness of cancer prevention and early detection among employees of global companies, and ultimately help reduce the number of new cancer cases in the future.

Roche were among the first leading pharma companies to step in and partner with UICC in 2008. Since then, they have shown constant and keen interest in our innovative and impactful initiatives, and paved the way for others to support UICC’s main priorities that benefit the cancer community worldwide. Roche has particularly valued our global advocacy efforts which encourages policy change, as well as the dialogue that was generated with key stakeholders in cancer control as a result of their presence at the World Cancer Congress in Melbourne. Roche is also a great supporter of World Cancer Day.

Astellas joined our family of Vanguards in 2014 with the clear ambition to help the cancer community achieve higher standards of health and transform the outlook for cancer patients, as stated by Mr Yoshihiko Hatanaka, Chairman and CEO of the company: “At Astellas we are actively engaged in resolving global health issues. There are unique opportunities to influence the inclusion of cancer-related targets and indicators in the post-2015 development agenda which will impact directly the way the disease is treated and prevented; there has never been a more tangible and immediate opportunity to affect change.”
MAXIMISING OUR IMPACT THROUGH STRATEGIC PARTNERSHIPS

UICC recognises that innovative and strategic partnerships with organisations committed to the fight against cancer are fundamental to delivering the targets of the World Cancer Declaration. To this end, in 2014 UICC:

- Continued close collaboration with the World Health Organization (WHO) with a focus on ensuring appropriate representation of cancer medicines on the WHO Model List of Essential Medicines, and on supporting implementation of the recently adopted palliative care resolution by contributing to the WHO Technical Advisory Group on Palliative Care. Most notably, UICC worked with WHO to develop and disseminate the WHO Cancer Country Profiles that were launched at the 2014 World Cancer Congress.
- Developed and submitted a new three-year joint workplan with WHO – this is a key requirement for maintaining UICC’s status as a non-governmental organisation in official relations with WHO.
- Became a formally recognised NGO partner of the United Nations Office on Drugs and Crime (UNODC), and contributed to discussions on the development of a new WHO-UNODC civil society partnership in 2014.
- Set up a task team to review its strategic partnership with the International Agency for Research on Cancer (IARC).
- Launched the Cancer Atlas 2nd Edition at the 2014 World Cancer Congress - a joint collaboration between the American Cancer Society, IARC, and UICC – with regional launch events planned throughout 2015.
- Renewed its strategic partnership with the International Atomic Energy Agency (IAEA).

UICCP LAYS A UNIQUE ROLE IN CONVENING INFLUENTIAL PARTNERS TO DRIVE ACTION IN PRIORITY AREAS

NCD ALLIANCE

This past year has demonstrated the unstoppable momentum behind the NCD agenda, with the NCD Alliance playing a central role in advocacy and accountability.

A pivotal milestone for global campaigning efforts was the UN Review on NCDs in July.

Three years after the 2011 UN High-level Meeting on NCDs, the Review provided an opportunity for governments to take stock of progress and translate global commitments into national action. The NCD Alliance and its network contributed to the adoption of an Outcome Document with bold and measurable national commitments.

Simultaneously, the NCD Alliance has worked to ensure NCDs are central to the post-2015 development agenda. Efforts have focused on collaborating with the broader global health community to safeguard the position of health, and establishing the political and technical foundations for a specific NCD target.

2014 has also been remarkable for the NCD Alliance’s increased support for national and regional capacity building. It is our belief that a vibrant civil society movement is fundamental to reaching the ‘25 by 25’ target of reducing premature deaths from NCDs.

Through the NCD Alliance’s civil society capacity building programme ‘Strengthening Health Systems, Supporting NCD Action’, civil society monitoring initiatives were pioneered by partners in the Caribbean, South Africa and Brazil. The network of local NCD alliances has grown to 28 national and four regional alliances, and models of cooperation and twinning between alliances such as the East Africa NCD Alliance Initiative have proven effective.

Furthermore, the NCD Alliance announced the first Global NCD Alliance Forum, to be held in November 2015 in Sharjah, UAE. The Forum will be hosted by Her Highness Sheikha Jawaher Bint Mohammed Al Qasimi, Wife of the Ruler of Sharjah, Founder and Royal Patron of the Friends of Cancer Patients charity, International Ambassador of the World Cancer Declaration for UICC and the International Ambassador for Childhood Cancer for UICC. The Forum will bring together representatives from national and regional NCD alliances to share lessons learnt and support organisational development.

UICC continues its commitment to the NCD Alliance, chairing the Steering Group and operating as the fiscal agent for the organisation.
The stage of cancer at diagnosis is an increasingly important component of cancer surveillance and cancer control, and an endpoint for the evaluation of population-based screening and early detection efforts. Integration of staging and reporting into cancer surveillance is an important step as cancer control strategies are scaled up.

Published for more than 50 years, the UICC TNM classification of malignant tumours is the internationally accepted standard for cancer staging. Working with a vast network of expert volunteers, UICC provides the new editions of the TNM classification as global public goods. For example, in 2014 a TNM Cancer Atlas was published and the Manual of Clinical Oncology manuscript was finalised. UICC’s TNM committee is also working with IARC to develop simple staging tools to support low- and middle-income countries, such as CanStaging with the Northern Ireland Cancer Registry, and a set of training modules with e-cancer.

Partners
Centers for Disease Control and Prevention USA, Wiley

Despite the compelling evidence that national cancer control plans (NCCPs) can be effective in improving the coverage and quality of cancer services and patient outcomes, many countries struggle to develop and implement NCCPs. While a WHO survey published in 2012 reported that 81% of countries had cancer plans, policies, or strategies in place, only 59% were considered operational and only 48% had operational plans with dedicated funding.

Launched in 2012, the International Cancer Control Partnership (ICCP) is a key collaboration between international organisations focused on cancer control that pools efforts in cancer control planning. The first product of the initiative was the launch of the ICCP Portal (iccp-portal.org) which currently features a map of over 200 published national cancer control and NCD plans, over 300 key resources for cancer planners, and new tools such as the Knowledge Summaries of Comprehensive Approach to Breast Cancer, the WHO Cancer Country Profiles 2014, and the Cancer Atlas 2nd Edition launched in 2014.

African Organisation for Research and Training in Cancer, American Cancer Society, American Society of Clinical Oncology, Breast Health Global Initiative, Cancer Council of the Pacific Islands, Centers for Disease Control and Prevention USA, International Agency for Research on Cancer, International Atomic Energy Agency – Program of Action for Cancer Therapy, International Cancer Control Congress Association, Latin American and Caribbean Society of Medical Oncology, LIVESTRONG Foundation, London School of Hygiene and Tropical Medicine, National Cancer Institute USA, Red de Institutos Nacionales de Cáncer, Union for International Cancer Control, University of Hawaii, World Health Organization – PAHO, AFRO, EMRO, EURO, World Health Organization HQ - Department of Chronic Diseases and Health Promotion (CHP)
GLOBAL TASK FORCE ON RADIOThERAPY FOR CANCER CONTROL (GTFRCC)

The Global Task Force on Radiotherapy for Cancer Control (GTFRCC) was established in 2012 by the UICC President, Mary Gospodarowicz, to highlight the value radiotherapy brings to global cancer control.

In 2014, GTFRCC achieved a major milestone by presenting its first findings using the investment framework architecture at the World Cancer Leaders’ Summit and the World Cancer Congress. The Chair of the GTFRCC Secretariat, David Jaffray, and leaders in the GTFRCC working groups, Rifat Atun, Yolande Lievens, and Michael Barton, quantified the radiotherapy inequity problem and demonstrated the positive economic benefit of an investment into radiotherapy. Based on the input from each working group, the investment framework was able to integrate a linear investment model, IARC-derived data on the growing cancer burden, and radiation utilisation rates to determine both the accruing benefit in life-years saved, as well as the corresponding economic impact of a structured investment in radiotherapy.

The GTFRCC working groups and Secretariat have also been active in building awareness and engagement over the past year by:

- Contributing a chapter on radiotherapy to the Disease Control Priorities 3 (DCP3)
- Publishing editorials about the radiotherapy inequity problem and the need for creative thinking in solving the burgeoning cancer control issue, in Lancet Oncology and Clinical Oncology journals.
- Establishing the GlobalRT Initiative, a social media platform built to educate the public on radiotherapy, by the Young Leaders of the GTFRCC.

Overall, the GTFRCC efforts are highlighting the potential to connect the details of radiotherapy needs to the global machinery for advancing cancer services. The response and interest in the work highlights the urgency for action and the opportunity for impact.

Varian Medical Systems has been a leading and highly engaged Vanguard partner of UICC since 2011. We share a commitment to raise the profile of radiotherapy on the global health agenda, with the ambition of improving access to the highly effective treatment protocol that improves the survival rate of individuals with cancer.

Elekta’s vision is to “pioneer cutting-edge cancer care and to become the number one partner of care in oncology and neurosurgery”. This ambition has led Elekta to become a major UICC Vanguard partner, and an active champion of our initiatives to raise the importance of radiotherapy as a core element of comprehensive cancer management.

Accuray provides precise, innovative radiation therapy and radiosurgery solutions for the treatment of cancer and other diseases. Accuray first partnered with UICC in 2014, and our common endeavors contribute to dispelling the existing cancer myths and misconceptions, and combating the inability to treat the disease effectively around the world.
MCCABE CENTRE FOR LAW AND CANCER

In 2014, the McCabe Centre for Law and Cancer (McCabe Centre), a joint initiative of Cancer Council Victoria and UICC, consolidated its role as a WHO Framework Convention on Tobacco Control (FCTC) knowledge hub on legal challenges to implementation of the convention, launching a knowledge hub website and providing assistance to countries under legal challenge from the tobacco industry.

It also continued its work on law and cancer treatment covering access to treatment and care, discrimination in the workplace and in obtaining insurance, laws at end-of-life, informed consent to cancer treatment, and regulation of unregistered complementary and alternative medicine practitioners.

The year also saw the McCabe Centre conduct two major international workshops:

4-week Intensive Legal Training Programme
February – March 2014, Melbourne, Australia

The programme, conducted in collaboration with the Secretariat to the WHO FCTC and the WHO Regional Offices for Africa and the Western Pacific, provided intensive training primarily to government lawyers from low- and middle-income countries. The course covered legal issues across the cancer continuum, from prevention to treatment and supportive care. Twenty-seven government and NGO representatives from 22 countries participated: Botswana, Brunei, Cambodia, China, Cook Islands, Fiji, Georgia, Ghana, Lesotho, Malaysia, New Zealand, Niue, Norway, Palau, Philippines, Senegal, Sierra Leone, Singapore, Sri Lanka, Thailand, Togo and Vietnam.

1-week Workshop
December 2014, Melbourne, Australia

The workshop, conducted in collaboration with the Secretariat to the WHO FCTC and WHO Headquarters, was held in conjunction with the 2014 World Cancer Congress. The aim of the workshop was to equip participants with the knowledge to coordinate and deliver training on law and cancer prevention, treatment, supportive care and research, in their own countries and regions. Participants included two representatives from WHO headquarters, a representative from each of the WHO regional offices of AFRO, PAHO, and WPRO, the WHO Indonesia country office, and nine government, NGO, and academic representatives from Brazil, India, Kenya, Lesotho, Philippines, Senegal, Sri Lanka and Thailand.

Partners

The Norwegian Cancer Society joined our group of forward thinking Vanguards in 2011, to share their unique expertise and affect change internationally. In addition to their involvement in our advocacy and convening activities, they have endorsed our ambitious project to establish collaborative centres across Europe as part of the McCabe Centre for Law and Cancer, and harness international legal expertise to foster cancer prevention and control through a more effective use of the law.

Australian Department of Health, Cancer Council Australia
GLOBAL INITIATIVE FOR CANCER REGISTRY DEVELOPMENT (GICR)

Challenge

The ability to plan and evaluate cancer programmes at the national level is an essential component of delivering effective cancer control strategies and quality care services. Cancer information systems drawing on data from population-based cancer registries form an essential pathway to achieving these goals. There is an urgent need to build this capacity in the world’s poorest regions for countries to be able to respond to their growing cancer burden. Key activities in each region are to provide localised training and tailored support, to foster research, and to assist with advocacy and the development of networks.

UICC’s response

UICC is a key player in an international working partnership with the International Agency for Research on Cancer (IARC), who lead GICR, which was launched in 2011. The first phase of the Global Initiative for Cancer Registry Development has been to catalyse the establishment of a network of six expert hubs/networks in the regions with most need. Key activities in each region are to provide localised training and tailored support, to foster research, and to assist with advocacy and the development of targeted workplans. GICR will be active in 20 low- and middle-income countries by 2020, and a further 30 by 2025.

WORLD CANCER DAY

On 4th February 2014, UICC celebrated World Cancer Day hand-in-hand with its members, partners, and supporters around the world.

In the last couple of years the World Cancer Day campaign saw a breakthrough in recognition and visibility with the levels of public and media interest growing exponentially in 2014, and we are proud to say that we achieved 8.7 billion opportunities to see, hear, or read about World Cancer Day.

These results have led to this international awareness day becoming a firm and significant fixture in the calendars of cancer organisations and the media around the globe.

The 2014 campaign focused on reducing stigma and dispelling myths about cancer (Target 5 of the World Cancer Declaration) under the tagline ‘Debunk the myths’, to improve general knowledge and challenge misconceptions about the disease.

The campaign was articulated around four key myths that are found in cultures and countries around the globe:

- We don’t need to talk about cancer
- There are no signs or symptoms of cancer
- There is nothing I can do about cancer
- I don’t have the right to cancer care

With special thanks to the World Cancer Day Advisory Group, UICC Board of Directors, and Member Organisations and Partners who helped to develop, translate, and disseminate the campaign around the world.

“"We were delighted to see the enormous interest in World Cancer Day this year. The campaign helped us achieve increased levels of media coverage around the world about cancer prevention. It was a huge success. Congratulations UICC!""

Kate Allen, Director, Science and Public Affairs, World Cancer Research Fund International
UNITING THE CANCER COMMUNITY

Boehringer Ingelheim is one of the world’s leading research-driven pharmaceutical companies with more than 125 years of experience. They joined the UICC Champions Programme in 2012, and have identified great synergies between their vision ‘Lead and Learn’ and UICC’s convening activities. We are pleased to have them as active supporters of the World Cancer Day campaign.

Bristol-Myers Squibb (BMS) has been on the leading edge of cancer treatment since 1970 and continues to develop new and improved options in that space. BMS became a UICC partner in 2012 and since then have been particularly supportive of our global advocacy work and are highly engaged in our different events. In 2014, BMS showcased their leadership in immuno-oncology at the World Cancer Congress and also joined the World Cancer Day Corporate Advisory Group.

WORLD CANCER CONGRESS

Australia was at the centre of the global fight against cancer from 3-6 December 2014, with over 2,700 delegates from 105 countries descending on Melbourne for the 2014 World Cancer Congress (WCC) which was hosted by Cancer Council Australia.

Under the banner of ‘Joining Forces – Accelerating Progress’ and through plenary sessions, roundtable discussions, lively debates and symposia, critical issues, such as prevention and screening, diagnosis and treatment, survivorship and palliative care, and cancer control systems were tackled.

With a truly innovative programme that included the new additions of the Big Debates, Big sCreen sessions, e-poster pods, Master Courses, and UICC Members’ Regional meetings, there was something for everybody to engage in.

Attendance was up 35% from the 2012 WCC in Montréal, with UICC members representing 38% of all participants.

The Global Village, networking events, and workshops organised throughout the week provided an exceptional interactive environment, which resulted in delegates rating these opportunities as their number one Congress highlight.

With 98% of the participants stating they would recommend the World Cancer Congress to a colleague, and 88% rating it from “very good to outstanding” (up by 12 points from Montréal), the 2014 World Cancer Congress was a record-breaking success.

We would like to thank the 2014 World Cancer Congress Platinum sponsors: American Cancer Society, Bupa, Cancer Council Australia, National Cancer Institute USA, and Roche.

Mark your calendars now for the 2016 World Cancer Congress, to be hosted by the French League against Cancer (La Ligue) and L’Alliance des ligues francophones Africaines et Méditerranéennes contre le cancer (ALIAM), and held from 31 October – 3 November 2016 in Paris, France.

www.worldcancercongress.org

“One of the great rewards of attending the World Cancer Congress was not only meeting with international counterparts, but also identifying common challenges and sharing internationally applicable strategies to reduce the impact of cancer. The World Cancer Congress is a landmark event in the international cancer control calendar, and I would like to acknowledge the Union for International Cancer Control and Cancer Council Australia for hosting the highly successful 2014 edition.”

Helen Zorbas, Chief Executive Officer, Cancer Australia

“UICC is fortunate to have such a strong leadership and network of members. We are working to build relationships with UICC members and the World Cancer Congress offers an unprecedented opportunity to network with them and discuss areas of common interest.”

Herb Riband, Vice President, Value, Access & Policy, Amgen (Europe) GmbH

The French League against Cancer (La Ligue), counted amongst the most influential of UICC members, has largely contributed to the development of the national cancer plans launched by the French Government since 2009. La Ligue has been engaged in our education and training programmes for years, and has supported the expansion of UICC’s membership in francophone Africa. Their engagement will be taken to the next level as they prepare to host the 2016 World Cancer Congress in Paris.

Novartis have a long-standing history of successful collaboration with UICC dating back to 1997. More recently, they were one of the first organisations to pledge support for the ‘Together we are Stronger’ and the current ‘Together for Action’ fundraising campaigns, and to get engaged in the 2014 World Cancer Congress.
WORLD CANCER LEADERS’ SUMMIT

On 3rd December 2014, the World Cancer Leaders’ Summit convened 250 global cancer and health leaders in Melbourne, Australia, to discuss cost-effective strategies in cancer control as integral parts of a sustainable socioeconomic development agenda that can influence governments to include cancer control in their national health strategies and plans.

Dr Pradeep Philip, Secretary, Department of Health Victoria, opened the plenary discussions, stressing that cancer accounts for 5-7% of healthcare costs in high-income countries, and that the current economic approaches to cancer and healthcare should redirect spending to improve value, as cancer care needs to be very much considered as a journey towards a health outcome.

Dr Etienne Krug, Director for Management of NCDs, Disability, Violence, and Injury Prevention at the World Health Organization (WHO), announced the launch of the much-awaited WHO Cancer Country profiles which synthesise the status of cancer prevention and control in 194 countries.

Finally, Dr Rifat Atun, Professor of Global Health Systems at Harvard University, demonstrated the economic benefit of investing in radiotherapy now, drawing on the suggested early results of a study conducted on behalf of the Global Task Force on Radiotherapy for Cancer Control (GTFRCC).

The rest of the day was dedicated to break-out sessions, which further explored the existing challenges and opportunities to articulate compelling investment cases respectively for tobacco, vaccinations, screening, radiotherapy, palliative care, and national cancer control planning.

Last but not least, the Summit saw the launch of the UICC publication ‘The Economics of Cancer Prevention and Control’, which aims to dispel the misconception of cancer being too difficult and too expensive to address.

PROMOTING GREATER EQUITY
CAPACITY BUILDING PROJECTS

GLOBAL EDUCATION AND TRAINING INITIATIVE (GETI)

Challenge
The global deficit of healthcare workers is estimated at over four million at the primary care level alone. Low- and middle-income countries suffer the largest workforce shortages, whilst also facing the greatest rate of increase in cancer burden. This critical gap is one of the greatest challenges facing the management of cancer today.

UICC’s response
UICC has more than 50 years of experience in providing training and capacity building across the field of cancer control. In 2014, over 70 talented professionals received a UICC fellowship and another 200 cancer professionals were trained in their own countries through workshops. New initiatives included Master Courses offered in parallel to the World Cancer Congress in which over 400 cancer control professionals registered and, in collaboration with the Chinese Anti-Cancer Association, a fellowship scheme was launched to tackle the growing cancer crisis in China which faces over three million new cases every year.

Partners
American Cancer Society, American Society of Clinical Oncology, Cancer Council Australia, Cancer Society of Finland, Danish Cancer Society, Dutch Cancer Society, French League Against Cancer, Israel Cancer Association, Swedish Cancer Society, Swiss League Against Cancer, UICC Japan, National Cancer Institute USA, Würth Elektronik.

Pfizer and UICC have enjoyed a long-term collaborative relationship. One of our common objectives is to empower women living with advanced breast cancer. In 2014, UICC developed the SPARC initiative (Seeding Progress and Resources for the Cancer Community), a metastatic Breast Cancer Challenge which aims to address the specific needs of women living with metastatic breast cancer. With a launch date of World Cancer Day 2015, Pfizer has pledged their commitment to SPARC through an unrestricted educational grant, on top of their continued Vanguard engagement.

Funding research, as well as training and education, are the core activities of the Swedish Cancer Society (Cancerfonden). Our partnership since 2012 has contributed to tackling the critical shortage of skilled cancer professionals through UICC’s fellowships programmes, and to reinforce cancer research capacity in low- and middle-income countries.
CHILDHOOD CANCER (CHICA)

Challenge

Despite remarkable treatment advances in childhood cancer that has resulted in a survival rate of more than 80% for children diagnosed with cancer in high-income settings, the majority (150,000) of the 270,000 children diagnosed with cancer each year reside in low- and middle-income countries where most have little or no access to treatment and will die due to their disease. If treated, cure is possible and can lead to decades of productive life.

UICC’s response

In partnership with Childhood Cancer International (CCI) and the International Society of Paediatric Oncology (SIOP), UICC has spearheaded a campaign targeted at primary and community healthcare workers to raise awareness on early ‘Signs and Symptoms’ of childhood cancer. Disseminated in over 40 countries so far, the materials are now available and being tried and tested in numerous languages.

Since 2005, My Child Matters, the joint UICC and Sanofi Espoir Foundation initiative, has provided support to 51 hospitals and NGOs in 33 countries to reduce inequalities between developed and resource-constrained countries through grassroots projects.

UICC supports workshops and fellowships in paediatric oncology to build skills in areas such as paediatric oncology registries, and treatment and care of children with cancer, including paediatric palliative care.

Partners

Friends of Cancer Patients, Sanofi Espoir Foundation

The Friends of Cancer Patients are a prominent UICC Patron and a leading member in the United Arab Emirates as well as in the international arena. Her Highness Sheikha Jawaher Bint Mohammed Al Qasimi, Wife of the Ruler of Sharjah, Founder and Royal Patron of the Friends of Cancer Patients charity, is the prestigious International Ambassador of the World Cancer Declaration for UICC, the International Ambassador for Childhood Cancer for UICC, and a supporter of the NCD Alliance. Her Highness and the Friends of Cancer Patients will host the first ever Global NCD Alliance Forum in November 2015 in their home Emirate of Sharjah.
CERVICAL CANCER INITIATIVE (CCI)

**Challenge**

Every year, more than 500,000 women worldwide are diagnosed with cervical cancer and approximately 260,000 succumb to the disease. In 2012, 87% of all deaths attributed to cervical cancer occurred in less developed countries, despite this being a preventable cancer.

**UICC’s response**

Launched in 2012 in collaboration with key partners; PAHO, the Network of Latin American Cancer Institutes (RINC), International Planned Parenthood Federation (IPPF), PATH, and local UICC members, CCI country activities focus on Central America due to the high cervical cancer-related mortality in the region. Current projects are in El Salvador, Guatemala and Honduras, with plans to launch in Nicaragua and Belize in 2015. The focus is to support ministries of health in updating strategies and guidelines for improved programme implementation.

**Partners**

American Cancer Society, American Society for Clinical Pathology, Centers for Disease Prevention and Control USA, Canadian Cancer Society, Dutch Cancer Society, Fondation Philanthropia.

GLOBAL ACCESS TO PAIN RELIEF INITIATIVE (GAPRI)

**Challenge**

The opioid analgesic morphine has been available for decades if not centuries. It is cheap, easily administered, and effective in controlling moderate to severe pain. Despite this there are unacceptable disparities in the worldwide access to palliative care services demonstrated by opioid usage within high-income countries consuming 93% of the world’s morphine supply, while 70% of deaths from cancer occur in low- and middle-income countries.

**UICC’s response**

UICC is collaborating with the United Nations Office on Drugs and Crime (UNODC), the World Health Organization (WHO), and International Narcotics Control Board (INCB) to improve knowledge of the barriers to access for medicinal use of controlled medicines and coordinate collaboration to implement solutions to overcome these barriers. At the national level, GAPRI works closely with governments, UICC members, and key partners to integrate effective pain relief into public health systems. Specifically, the joint GAPRI and American Cancer Society programme ‘Treat the Pain’ has contributed to the availability of 2.8 million days of pain treatment in Nigeria, Kenya, and Uganda. Working with its members and civil society partners, UICC garnered widespread support for the landmark Palliative Care Resolution - ‘Strengthening of palliative care as a component of integrated treatment throughout the life course’ - that was adopted at the May 2014 World Health Assembly.

**Partners**

American Cancer Society, Fondation Philanthropia, United Nations Office on Drugs and Crime

The Dutch Cancer Society sent a strong message to the wider cancer community when they took the lead in becoming Patrons and the biggest supporters of the UICC Champions Programme in 2012. Since then, our group of valued Champions has grown to 52. We pay tribute to the on-going efforts and the exceptional contribution that the Dutch Cancer Society has made over the last years to help us put cancer on both the global health and development agendas, expand access to cervical cancer prevention across Central America, and establish new regional cancer registry hubs in Asia and Africa.

The American Society for Clinical Pathology has been a UICC member since 2011 and our partner since 2014. They are the world’s largest professional membership organisation for pathologists and laboratory professionals. Encompassing 30,000 members, the American Society for Clinical Pathology has worked with UICC to deliver a workshop on cervical cancer prevention in Central America, and to increase the capacity of healthcare professionals in the region.
Throughout 2014 UICC has continued to work closely with its members and network of partners to encourage global leaders to make the strongest possible cancer control commitments, support their implementation, and hold them accountable for the promises they have made.
ADVOCACY

Key advocacy milestones in 2014 include:

May 2014: Adoption of a landmark resolution on palliative care

The WHO resolution ‘Strengthening of palliative care as a component of integrated treatment throughout the life course’ is the culmination of over three years of meaningful collaboration between UICC, civil society partners and a core group of UN Member States led by Panama.

UICC members played a pivotal role in securing support for this resolution in all regions by reaching out to their Ministers of Health and sharing key messages, every step of the way.

The resolution will help drive action at a national level and marks a turning point in our efforts to bring palliative care and pain relief to those who need it most.

July 2014: Renewed global commitment to fighting cancer and other NCDs

Marking three years since the UN High-level Meeting on Non-communicable Diseases (NCDs), the UN Review on NCDs that took place in July in New York was an opportunity to take stock of progress, and gather consensus on transforming commitments into action at the national level.

UICC had a strong presence at the Review and the Civil Society Hearing that preceded it. Most notably, UICC’s then President-elect, Tezer Kutluk, was selected as the opening plenary speaker, representing the civil society movement for NCDs.

The Review culminated in the unanimous adoption of an Outcome Document that includes bold and measurable national commitments, including calling upon governments to set national NCD targets and develop national multisectoral plans by 2015.

November 2014: Global Coordination Mechanism on NCDs kicks-off activities

UICC was informed in November 2014 that its application to become a Participant in the WHO Global Coordination Mechanism (GCM) on NCDs had been successful, and as such UICC would be invited to participate in a number of consultation processes and other GCM initiatives beginning in 2015. This is an important step towards meaningful collaboration with key multisectoral partners to help ensure delivery of the 2025 NCD commitments.

Partners

American Cancer Society, Bayer, Canadian Cancer Society, Dutch Cancer Society, LIVESTRONG Foundation, National Cancer Institute USA, Norwegian Cancer Society, Novartis, Swiss Cancer League, World Cancer Research Fund International

The Canadian Cancer Society is a powerful UICC member, focused on research, advocacy, prevention, information, and support. In 2012, they became a UICC Vanguard partner to leverage their expertise and strengthen the capacity and impact of the Canadian cancer community at a global level. They have since actively championed for greater equity, supporting the attendance of cancer organisations from low- and middle-income countries at UICC’s international events.

The Cancer Society of Finland is one of the oldest UICC members, having joined in 1962. It has a unique operating model which brings together scientists, clinicians, decision-makers, financial experts, volunteer helpers, and patients from 12 regional cancer societies and four patient organisations in Finland. The Cancer Society of Finland was among one of the first members to join the new UICC campaign ‘Together For Action’ in 2014, as part of their commitment to help the cancer community accelerate the pace of change in global priority areas.
